**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 2-4, 8-10, 12-14, 17, 19-22 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 5-7, 11 and 15 rejected under 35 U.S.C. 103(a) as being unpatentable over JP 09-83013 in view of Shibata (5,309,018).

Regarding Claims 1, 5-7, 11 and 15, JP 09-83013 discloses in Fig. 2 and 3, tiebars 1, semiconductor elements 2 and 3 loaded on to leads and insulated with resin 6. JP 09-83013 fails to disclose the required positioning hole and the required deformable tiebars. However, Shibata discloses lead frame having deformable supports where in Fig. 1, tiebars 1 are disclosed to be flexible/deformable and the positioning holes 9 are used for positioning the package.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required deformable tiebars and the positioning holes in JP 0983013 as taught by Shibata in order to have a semiconductor package with more reliability and ease of manufacture.
